

Microcurrent pain management course

How to become a competent practitioner with Microcurrent Electrical Therapy (MET) for pain management

One-day Physio First Approved Workshop in the North-West

For Physiotherapists, Sports Therapists & other Practitioners

2nd July 2017

Tutor

Dawn Rothwell

AdvDipL5 STRM, MFRT. ESTRM, MSTO, MIPTI BHSI instructor, AdvDip Sports Therapy, Remedial Massage & Myofascial Release. Cert' Medical Acupuncture, Thermography Technician, Cert' in spinal Manipulation.

"Microcurrent treatment works really well and helps most people. The pain goes in minutes and it's great because it provides a drug-free form of pain relief"

Dr Tim Watson

" Microcurrent based therapies appear to have the capacity to positively influence both tissue repair and pain management, making it a potentially useful tool for use by therapists and patients"

Course Aims

Understand & practice protocols for pain conditions with Microcurrent Electrical Therapy & to reach a competent level to use this technology in a clinic

Learning Objectives

- Identify the conditions that MET can be used with
- Demonstrate how to use MET using a variety of protocols
- Evaluate MET treatment
- How to access research and guidance for continued use of MET in a clinic

Feedback from Course Attendees

"I came open minded and learnt a lot"

"I found the course very informative and well presented"
