DUROLANE
POWERFUL &
LONG-LASTING
PAIN RELIEF

Summary of Indications for Use:

DUROLANE (3 mL): Is indicated for the symptomatic treatment of mild to moderate knee or hip osteoarthritis. In addition, DUROLANE has been approved for the symptomatic treatment associated with mild to moderate osteoarthritis pain in the ankle, shoulder, elbow, wrist, fingers, and toes.

DUROLANE is also indicated for pain following joint arthroscopy in the presence of osteoarthritis within 3 months of the procedure.

Summary of risks: You should not use DUROLANE if you have infections or skin disease at the injection site. DUROLANE has not been tested in pregnant or lactating women, or children. Risks can include transient pain, swelling and/or stiffness at the injection site.

Full prescribing information can be found in the product labeling, or at DUROLANE.com/IFU.
